

[NICOLE] XUN CAI

Water Quality Modeling ORISE Fellow, US Environmental Protection Agency (EPA), Region 3,
Chesapeake Bay Program Office

1750 Forest Drive, Suite 130, Annapolis, Maryland 21401

Work: 410-267-9829; Cell: 804-832-4816

Email: xcai@chesapeakebay.net; nicolecx12@gmail.com

Education

| | |
|-------------------------------|---|
| Ph.D. in Marine Science, 2022 | College of William and Mary, Gloucester Point, VA |
| M.S. in Marine Science, 2018 | College of William and Mary, Gloucester Point, VA |
| B.S. in Oceanography, 2015 | Nanjing University, Nanjing, China |

Appointments

| | | |
|---|-------------------------------------|----------------|
| Chesapeake Bay Program Office, EPA Region 3, MD | ORISE Fellow | 2021 – present |
| Virginia Institute of Marine Science, VA | Research Assistant | 2015 – 2021 |
| University of Oldenburg, Germany | International Fellow | 2017 |
| National Chiao Tung University, Taiwan | Summer Intern | 2014 |
| Nanjing University, China | Undergraduate Research Assistant | 2012 – 2015 |

Manuscripts in Progress

Cai, X., Shen, J., Zhang, Y., J., Qin, Q., and Linker, L., Impacts of sea-level rise on the tidal marshes and estuarine biochemical processes. In prep for *Journal of Geophysical Research: Biogeosciences*

Qin, Q., **Cai, X.**, and Shen, J. Identifying transport-determined accumulation locations of waterborne constituents in Chesapeake Bay. In prep for *Geophysical Research Letters*

Publications

Cai, X., Shen, J., Zhang, Y., J., Qin, Q., and Linker, L., 2023. The Roles of Tidal Marshes in the Estuarine Biochemical Processes: A Numerical Modeling Study. *Journal of Geophysical Research: Biogeosciences*. <https://doi.org/10.1029/2022JG007066>

Biophysical interactions control the progression of harmful algal blooms in Chesapeake Bay: a novel Lagrangian particle tracking model with mixotrophic growth and vertical migration. *Limnology and Oceanography Letters*. <https://doi.org/10.1002/lol2.10308>

Cai, X., Qin, Q., Shen, J. and Zhang, Y., J., 2022. Bifurcate Responses of Tidal Range to Sea-level Rise in Estuaries with Marsh Evolution. *Limnology and Oceanography Letters*. 7(3), pp.210-217. <https://doi.org/10.1002/lol2.10256>

Tian, R., **Cai, X.**, Testa, J., Brady, D.C., Cerco, C. and Linker, L., 2022. Simulation of high-frequency dissolved oxygen dynamics in a shallow estuary, the Corsica River, Chesapeake Bay. *Frontiers in Marine Science*, 9, p.2580. <https://doi.org/10.3389/fmars.2022.1058839>

Qin, Q., Shen, J., Tuckey, T.D., **Cai, X.** and Xiong, J., 2022. Using Forward and Backward Particle Tracking Approaches to Analyze Impacts of a Water Intake on Ichthyoplankton Mortality in the Appomattox River. *Journal of Marine Science and Engineering*, 10(9), p.1299. <https://doi.org/10.3390/jmse10091299>

Cai, X., Shen, J., Zhang, Y., J., Qin, Q., Wang, Z. and Wang H., 2021. Impacts of Sea Level Rise on Hypoxia and Phytoplankton Production in Chesapeake Bay: Model Prediction and Assessment. *Journal of American Water Resources Association*. <https://doi.org/10.1111/1752-1688.12921>

Cai, X., Zhang, Y., J., Shen, J., Wang, H., Wang, Z., Qin, Q., and Ye, F., 2020. A Numerical Study of Hypoxia in Chesapeake Bay Using an Unstructured Grid Model: Validation and Sensitivity to Bathymetry Representation. *Journal of American Water Resources Association*, 1–24. <https://doi.org/10.1111/1752-1688.12887>

Research Experience

| | |
|---------------------|---|
| Aug. 2021 – present | Develop and apply numerical models to support the historic Chesapeake Bay TMDL with technical support needed to restore and maintain Chesapeake living resources from challenges of climate change, growth, and other impacts, <u>funded by ORISE Research Participation Program at EPA</u> |
|---------------------|---|

Chesapeake Bay Phase 7 Model Development:

- Develop main Bay model (MBM) and multiple tributary model (MTM): link the phase 7 watershed model to the estuary model using unstructured grids and extend the model simulations to the shallow water habitats.
- Study the interactions between estuary and sub-estuaries.
- Study the impacts of climate change on shallow water systems

| | |
|---|--|
| Dissertation Chapter 4 Aug. 2021 – Mar. 2022 | Study the Interactions of Vegetations with Nutrient Dynamics in Chesapeake Bay, <u>funded by Delta Stewardship Council</u> |
|---|--|

- Study the impacts of sea level rise (SLR) on tidal marshes and estuarine biochemical processes.
- Cai, X. et al. 2022, *Limnology and Oceanography Letters*
- Cai, X. et al. in prep for *Journal of Geophysical Research: Biogeosciences*

| | |
|---|--|
| Dissertation Chapter 3 Apr. 2020 – Jul. 2021 | Study the Interactions of Vegetations with Nutrient Dynamics in Chesapeake Bay, <u>funded by Delta Stewardship Council</u> |
|---|--|

Chesapeake Bay Vegetation Modeling Development:

- Develop vegetation model: couple both marsh and SAV into water quality model with linkage to both water column and sediments.
- Study the roles of tidal marsh on estuarine nutrient dynamics and low-DO events.
- Cai, X. et al. in press, *Journal of Geophysical Research: Biogeosciences*

Dissertation Chapter 2 Study the Impacts of Sea Level Rise on Water Quality in
Jul. 2019 – Mar. 2020 Chesapeake Bay, funded by CA Department of Water Resources

- Study the impacts of SLR on hypoxia and phytoplankton production with numerical model SCHISM-ICM.
- Analyze the contributions of each physical and biochemical process to the changes on oxygen budget under SLR.
- Cai, X. et al. 2021, *Journal of American Water Resources Association*.

Dissertation Chapter 1 Study the Impacts of Sea Level Rise on Water Quality in
Aug. 2018 – Jun. 2019 Chesapeake Bay, funded by CA Department of Water Resources

Chesapeake Bay Water Quality Model SCHISM-ICM Development:

- Develop SCHISM-ICM in Chesapeake Bay to simulate hypoxia, phytoplankton production and other biochemical processes.
- Calibrate and analyze the significance of using unstructured grid model with non-smoothed representation of bathymetry.
- Cai, X. et al. 2020, *Journal of American Water Resources Association*.

Master Thesis Study the Impacts of SAV on Water Quality in San Francisco Bay
Feb. 2017 – July 2018 Delta, funded by CA Department of Water Resources

San Francisco Bay SAV Modeling Development:

- Develop SAV model: introduce SAV sub-model into water quality model with three components – leaf, stem and root as state variables, and calculate its relationship with the water column and sediments.
- Apply SCHISM-ICM to San Francisco Bay Delta, with SAV model imbedded, to simulate water quality and SAV biomass.
- Calibrate and analyze SAV impacts on flow, turbidity, dissolved oxygen, nutrients and plankton community.

Feb. 2016 – Jan. 2017 Study the Effect of pH on Nutrients Release and Algal Bloom in
the Back River, funded by Whitman, Requardt & Associates, LLP

Back River Water Quality and PH Modeling Development:

- Develop pH model: introduce equilibrium chemistry and numerical method for pH calculation into water quality model to calculate pH temporally and spatially.
- Introduce positive feedback mechanism between algal bloom, pH and internal processes into water quality model -- the nutrient release could be significantly

enhanced when the overlying water pH reached 8.5-9, and further boost the algal bloom, which would further increase the pH value.

- Calibrate ICM water quality model coupling SCHISM model, covering Chesapeake Bay, with introduction of pH model, to simulate Back River water quality and test the mechanism.

Undergraduate Thesis Monitoring and Management Systems of the Topographical
May 2013 – Apr. 2015 Change in Pearl River Estuary and Taiwan Shoal, funded by Public
Science and Technology Research

Numerical Simulation of the Bed-forms in The Taiwan Shoal:

- Analyze compiled sailing data in Taiwan shoal
- Develop statistical approach and assess the numerical relationship between the simulation and the remote sensing images

Awards and Grants

| | |
|-----------|---|
| Mar. 2023 | ECO-DAS XV Fellow , Association for the Sciences of Limnology & Oceanography, National Science Foundation, Honolulu, HI – “Enhanced Sulfide Flux by Resuspension: An Underestimated Piece to Estuarine Hypoxia” |
| Oct. 2021 | Juliette B. & Carroll W. Owens, Sr. Fellowship , VIMS, VA – for academic performance and progress in the Ph.D. Degree Program |
| Aug. 2020 | Commonwealth Coastal Research Fellowship , VIMS, VA – for dissertation research focus which strategically advances VIMS’ advisory service to the Commonwealth of Virginia in areas such as water quality research, and management and resilience approaches. |
| May. 2019 | CSDMS Integration Scholarship at <i>Community Surface Dynamics Modeling System meeting 2019</i> , Boulder, CO – “Impact of Submerged Aquatic Vegetation on Water Quality in Cache Slough Complex, Sacramento-San Joaquin Delta: A Numerical Study” |
| May. 2019 | Best Poster Award at <i>Southeastern Virginia Postdoctoral Symposium</i> , Gloucester Point, VA – “Numerical Study of Impact of Submerged Aquatic Vegetation on Water Quality in Cache Slough Complex, Sacramento-San Joaquin Delta” |

Other Presentations

| | |
|-----------|---|
| May 2023 | Oral presentation at <i>International Society for Ecological Modelling Global Conference</i> , Toronto, Canada – “Impacts of sea-level rise on the tidal marshes and estuarine biochemical processes” |
| Jun. 2022 | Oral presentation at <i>Chesapeake Bay Symposium</i> , Annapolis, MD – “Impacts of sea-level rise on the material exchange between tidal marshes and the estuary” |

- Jun. 2022 Oral presentation at *Chesapeake Bay Symposium*, Annapolis, MD – “Development of a Next-Generation Tributary Model in the tidal James River”
- Jun. 2020 Oral presentation at *Chesapeake Bay Symposium*, virtual – “Impacts of Sea Level Rise on Hypoxia and Phytoplankton Production in Chesapeake Bay: Model Validation and Assessment”
- Nov. 2019 Oral presentation at *Cerf*, Mobile, AL – “Numerical Simulation of Impacts from Sea Level Rise on Hypoxia in Chesapeake Bay Using an Unstructured Grid Model: Validation and Assessment”
- Apr. 2019 Lecture at *SCHISM Summit*, Sacramento, CA – “Introduction of SCHISM-ICM water quality model”
- Jun. 2016 Poster presentation at *Chesapeake Bay Symposium, 2016*, Williamsburg, VA – “Effect of pH on nutrients release and algal bloom in the Back River, Upper Chesapeake Bay”

Service to VIMS and Public Outreach

- 2019 - 2022 VIMS Ombudsperson – Peer mentor and confidential resource for graduate students to promote conflict resolution for problems that arise in the university setting.
- Aug. 2019 Oral presentation at *A Scientist Walks into A Bar – Grad Student Edition* – “To Save the Fish by Removing Seagrass?”
